Parents were asked to complete this survey in relation to *the child who gave them the survey, or the child in the year group your school directed them to answer for.*

The year group responses for your school are taken exactly as entered in the questionnaires. In some cases a small number (N) and percentage (%) may show up in year groups beyond those you would expect.

Number of respondents (N) and percentages (%) are presented throughout the report; **these are based on the number of respondents who completed the survey.** Due to rounding, percentages may not add up to 100.

Responses for your school have been compared to responses from schools that have taken part in the parent survey over the last two years (All Schools). Where the number of respondents is small, figures need to be treated with a degree of caution in order not to misinterpret the findings. Tables and charts will not be presented where less than five responses have been given.

Year groups above year 6 have been included so that middle schools could use one parent questionnaire with all of their parents.
