This report shows results for all the responses made by staff in your school to the NFER Primary Staff Survey.

Number of respondents (N) and percentages (%) are presented throughout the report; **these are based on the number of respondents who completed the survey**. Due to rounding, percentages may not add up to 100.

Responses for your school have been compared to responses from schools that have taken part in the staff survey over the last two years (All Schools). Where the number of respondents is small, figures need to be treated with a degree of caution in order not to misinterpret the findings. Tables and charts will not be presented where less than five responses have been given.
